## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed August 24, 2005 and Appeal Brief filed April 17, 2006 have been entered. Claims 1 and 3 have been amended. No claims have been cancelled. Claims 8-10 have been added. Claims 1-10 are now pending in this application, with claims 1 and 3 being independent.
2. In view of the Appeal Brief filed on April 17, 2006, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.
3. To avoid abandonment of the application, appellant must exercise one of the following two options:
  - (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
  - (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.
4. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-2 and 8-10 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.
6. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure, which goes to make up the device, must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.
7. In regards to claim 1, it is unclear as to where the preamble of the claim begins and/or ends. The structure of the claim is improper, in that it does not contain a preamble, which is distinct from the body of the claim.
8. Claims 1-2 and 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
9. In regards to claim 1, lines 1-2, a portable communications device is recited, however, at the end of line 6, a portable device is recited. It is unclear as to if the portable communications device and the portable device are one and the same.
10. In regards to claim 6, line 3, a - - , - - needs to be placed at the end of the line (i.e., after the word protocol), in order to particularly point out and distinctly claim the

Art Unit: 2614

subject matter. As currently recited, the claim is not distinctly pointing out the subject matter, which Applicant regards as the invention. By adding a coma at the end of line 3, claim 6 would distinctly claim the subject matter, which Applicant regards as the invention.

***Allowable Subject Matter***

11. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

12. Claims 2 and 6-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

13. Claims 3-5 are allowed.

14. The following is an examiner's statement of reasons for allowance: The invention as now claimed is not disclosed nor rendered obvious in view of the prior art of record. As to independent claim 3, the prior art of record fails to teach or suggest, alone or in combination, the recited system, in which a beacon device is capable of wireless message transmission, and at least one portable device is a capable of receiving the message transmission, where the beacon is arranged to broadcast, without receiving a communication from the portable device. No prior art was found that discloses or teaches the limitations of claim 3.

Art Unit: 2614

15. Claims 4 and 5 are dependent upon claim 3, therefore, claims 4 and 5 are allowed.

16. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
